Mayor Coleman Proposes Unprecedented Investment in Street and Alley Resurfacing

Neighborhood leaders today joined Mayor Michael B. Coleman and City Council members to announce a proposal for \$30 million in resurfacing as part of the 2011 Capital Improvements Budget. Mayor Coleman is proposing to resurface 141 streets and dozens of alleys, the largest single year investment in resurfacing and alleys in the city's history.

“Our neighborhoods are the lifeblood of our city, and we must invest in them,” said Mayor Coleman. “That is why we are investing in street resurfacing, sidewalks, bikeways and alleys that will improve safety and the quality of life for people across Columbus.”

Within the \$30 million for resurfacing, \$2.5 million will cover surface treatments for alleys. Alley surface treatments smooth the alley surface, fill potholes and apply a mix of crushed stone and a tar-like liquid emulsion. The proposed Capital Improvements Budget also includes \$4 million for new sidewalks and nearly \$3.5 million for bikeways, bike paths and bike pavement markings.

“This capital budget focuses resources where they matter most, in our neighborhoods,” said Councilmember Priscilla R. Tyson, chair of the Finance Committee. “These are projects our residents told us are important to them and that is why they are a priority for City Council.”

City Council is scheduled to vote on the proposed 2011 Capital Improvements Budget March 7.
